

Chinese Orchestra is powered by

The Engine that Enlivens.

QIN is a Windows native plugin engine developed by Kong Audio to realize the recreation of classic Chinese instruments.

QIN engine adopts a more accessible design paradigm. By combining intermediate Extenders, advanced patch programming can be achieved without the need to fumble with scripting, yet still retains advanced features.

With the help of QIN engine, Chinese Orchestra faithfully delivers the classic Chinese instruments.

Chinese Orchestra includes 22 instruments

1. ChineseWinds(笛子)
2. ChineseKong V3(打击)
3. ChineseErHu Ⅲ(二胡)

¡\$Verdict: The most comprehensive and convincing sampled authentic Chinese instrument sounds in the world.¡™

CHINEE ORCHESTRA

The First Chinese Orchestra Library Ever.

The inspiring of Chinese sound for composers and musicians alike.

www.chineekong.com

■ A Classic Chinese Orchestra

Chinee Orchestra contains a rich list of traditional Chinese instruments from the cream of Chinese history, covering four categories: Winds, Plucked, Strings and Percussion, thus making a full Chinese orchestra arrangement possible.

■ Meticulously Crafted Samples

Each sample has been hand-picked and crafted by top editors and the producer in China. The end results are the precision in every note and the way they are woven as a whole to be so expressive.

■ Worldwide Appreciation

Since 2005, Kong Audio's *Chinee Series* has received raving reviews from the media around the world, as well as from the composers in the business.

■ Made by Chinese Professionals for Chinese Professionals

It takes one who bathes in the same air and lives in the same civilization to produce the authentic sound, and to make it truly usable to satisfy the native composers. E.g., the legato in *Chinee Orchestra* has been specifically designed for the Chinese instruments. That is why *Chinee Orchestra* is the de facto tool of choice among the professionals.

■ Powered by QIN Engine

QIN engine is tailored-made to maximize the potential of Kong Audio instruments, and genuinely realizing the realism needed for getting the Chinese instruments recreated in the digital world.

■ Highly Customizable

Chinee Orchestra can be customized easily thanks to the intermediate Extender control system. You can get the music flowing in no time since QIN engine handles part of the task for you. To make it to fit your playing style better, you can combine the Extenders to customize the instruments to your hearts desire, if needed.

■ Unique Extenders System

Extenders extend the functions of the instruments. Currently there are more than 20 Extenders: 3?keyswitches , 2 legatos, microtuning, speed detection, pitch envelope, round-robin and many many more. New Extenders are added from time to time.

Genuine. Inspiring. Fun. All in one.
